

About NatureSolv™

Glatfelter has manufactured carbonless paper at our Chillicothe, Ohio facility for over 50 years. Although we have made carbonless for 5 decades, we are constantly looking for ways to improve our product in ways that our customers value.

We've spent many millions of dollars to engineer a new capsule system which not only retains a crisp image transfer in our carbonless products, but is also an environmentally responsible solution for our environment. NatureSolv was the result of this investment in the Chillicothe facility.

You may wonder, what makes NatureSolv different from other carbonless capsule systems. NatureSolv creates capsules from organic, naturally-occurring solvents which create less impact on the environment. The solvents in NatureSolv are found in everyday products, from food to health and beauty items. So it is truly a more environmentally responsible product line.

Also, you may have tried to purchase more environmentally responsible papers in the past and were told to pay a premium price for this product. NatureSolv capsule technology costs you NOTHING extra. It is in every roll, every sheet of Glatfelter Carbonless Paper.

Glatfelter Carbonless possesses unparalleled efficiency in the printing process, excellent image transfer, enhanced optical properties and it maintains an environmentally responsible standing on the environment. The perfect and ideal solution if you are a carbonless user.

ALL OF OUR CARBONLESS PAPERS ARE
MANUFACTURED IN CHILLICOTHE, OHIO
